

Jack is about to go drive for UBER around the local college campus, as he does almost every night.

On his way, the oil change light comes on AGAIN! Ever since he's been doing UBER, Jack has needed oil changes much more frequently.

Jack stops to fill his tank and make an appointment for an oil change, when he starts to wonder how much he's been spending on these types of things. He's been making good money uberbing, but is he putting it all back into his car?
